Important notice regarding PINs: A PIN is only needed for a licensee’s employer to do an E-Batch renewal. If a licensee needs a PIN to give their employer, they need to go to the license renewal page and enter their license number and one of the following: social security number or date of birth. The PIN number will then be displayed on the next page and the licensee may share it with their employer for E-Batch renewal.

A PIN is not needed for an individual licensee to renew online. Licensees can log into the renewal system by using their license number and one of the following: social security number or date of birth.
