

ILLINOIS ROOFING INDUSTRY LICENSURE EXAMINATIONS

The following information should help you prepare for the Illinois Roofing Industry licensure examinations. Part I contains general information about testing procedures. Part II describes the content of each examination and recommends study materials. Part III provides sample questions to help you prepare for these examinations. All questions are supported by one or more of the references identified in this bulletin.

Part I General Information

PURPOSE OF THE EXAMINATIONS

These examinations are required for professional licensure of Roofing Contractors by the Illinois Roofing Industry Licensing Act. Refer to the Act for a legal description of the profession and to determine which license you need to obtain. Copies of the Act are available from the Illinois Department of Financial and Professional Regulation (IDFPR) or on its website at <http://www.idfpr.com>.

TEST VALIDITY & TEST LENGTH

These examinations have been developed under the jurisdiction of IDFPR and reflect specifications, standards and practices that are supported by roofing industry professionals. All questions on these examinations have been subjected to strict psychometric controls and reviewed by a panel of roofing professionals. The time limit for the Illinois Residential Roofing Examination (limited license) is 90 minutes; the time limit for the Illinois Residential, Commercial and Industrial Roofing Examination (unlimited license) is 2½ hours. The Commercial and Industrial Roofing examination form is available only for candidates who already hold the Residential (limited) license and wish to qualify for the unlimited license; the time limit for this exam is 90 minutes.

CANDIDATE ELIGIBILITY

As mandated by Illinois statute, qualifications include verifiable experience in specified areas of employment and education as well as good moral character. If you wish to receive eligibility information, contact IDFPR for details.

APPLICATION FOR CANDIDACY

Obtain the proper application packet(s) from IDFPR or on their website. Complete the packet as instructed. You will be notified of your candidacy status (Accepted or Denied). If accepted, you will be notified of the date, time and site of the examination approximately 10 days prior to the date of the test.

STUDY MATERIALS & REFERENCES

Study materials for these examinations can be purchased directly from the National Roofing Contractors Association (NRCA), from bookstores such as Barnes and Noble, or from other online sources such as Amazon.com or Barnes & Noble's website (bn.com). All questions on these examinations are supported by one or more of these references.

MISSING AN EXAMINATION

There are no "make-up" examinations. You may re-register for the next examination date. **THERE ARE NO REFUNDS.**

WHAT TO BRING TO THE EXAM

Each candidate should bring two (2) sharpened Number 2 black lead pencils. Candidates also may bring a non-programmable, non-printing, solar- or battery-powered portable or pocket calculator. No power source will be available for calculators at the test site. No other types of calculators, computers, electronics, markers or writing tools will be permitted at any time during this examination.

**SUCCESS/
LICENSURE**

Candidates who score 70 or higher will receive a PASS notice and an application for licensure.

**FAILURE/
RE-EXAMINATION**

Candidates who score below 70 will receive a FAILURE notice and an application for re-examination. **As long as your employment, educational experience and application remain valid, there is no limit to the number of times you can take these tests.** Requalification may be necessary in some cases. Candidates are encouraged to retake the examination; many candidates who initially failed such an exam pass on subsequent attempts.

Part II Test Content and Recommended Study Materials

The Illinois Roofing Industry Licensing Act specifies two classifications of roofing contractor: Residential (limited) and Residential, Commercial and Industrial (unlimited). The Commercial and Industrial examination form is available only for candidates who already hold the Residential (limited) license and wish to qualify for the unlimited license. Content areas in each test form are outlined below. Sections 1-5 appear in all tests; Section 6 appears applies only to commercial and industrial roofing.

	Residential (Limited License)	Residential, Commercial & Industrial (Unlimited License)	Commercial & Industrial (See note below)
1. Safety and Employee Protection	20 Questions	25 Questions	15 Questions
2. General Roofing Preparations, Decks and Membranes	17 Questions	20 Questions	10 Questions
3. Roofing Materials and Steep-Slope Systems Asphalt Shingle, Tile, Slate and Wood Roofing, Architectural Metal, Reroofing, Moisture Control	26 Questions	40 Questions	15 Questions
4. Low-Slope Roofing Systems Design Guidelines, Reroofing, Moisture Control and Repair	7 Questions	15 Questions	10 Questions
5. Measurement and Estimating	5 Questions	9 Questions	9 Questions
6. Non-Residential Roofing Systems Metal Roofing Systems, Rigid Board Roof Insulation, Spray Polyurethane Foam, Waterproofing and Dampproofing	None	16 Questions	16 Questions
Total Test Length	75 Questions	125 Questions	75 Questions

NOTE: The Commercial and Industrial examination form is available only to candidates who already hold the Residential Roofing (limited) license and wish to qualify for the unlimited license.

RECOMMENDED STUDY MATERIALS

Part III Sample Test

All questions on these examinations are multiple choice with one correct answer; choose the BEST answer to each question. For this sample test only, references are provided in the answer key to help you prepare for these tests. All questions on each examination are supported by the above references. These are provided for information purposes only to illustrate the types of questions that will appear on each test. Questions like these will be on the tests, but none of these questions will be repeated on these tests.

1. Which organization sets safety standards for exposure of roofing employees to asbestos?
 - A. NRCA
 - B. OSHA
 - C. IDPR
 - D. IEPA

2. Which of these is recommended when the third pin on the plug of a power tool is missing?
 - A. Have the tool removed and repaired before it is used again.
 - B. Insert a temporary pin into the plug as a safety measure.
 - C. Use the tool only when it is plugged into a GFCI receptacle.
 - D. Use the tool only when it is plugged into a double-insulated cord.

3. What does NRCA recommend as the minimum clearance between a mechanical unit and walls drains, perimeters other penetrations in a roofing system?
 - A. 6 inches
 - B. 12 inches
 - C. 24 inches
 - D. 36 inches

4. Where should electrical conduit or other piping be installed?
 - A. Attached directly on top of the roof deck
 - B. Attached directly below the roof deck
 - C. Embedded within the roofing system
 - D. Suspended well below the roof deck

5. Which of these is most commonly used for underlayment in asphalt roofs?
 - A. Synthetic fiber felts
 - B. Saturant-grade asphalt
 - C. Coating-grade asphalt
 - D. Wood and other cellulose fiber felts

6. Which of these is **LEAST** likely to require tear-off and replacement of an existing steep roof?
 - A. Leaking around or near a chimney
 - B. Frequent repairs of the existing roof
 - C. Damage occurring to structural components
 - D. Leaking resulting in damage to building contents

7. Which of the following is **NOT** among the characteristics of cellular glass roof insulation?
 - A. Durability
 - B. Flexibility
 - C. Fire resistance
 - D. Stable R-value

8. Which of these is best to use when estimating the coverage of two plies of felt roofing underlayment on a steep-slope roof?
 - A. 25 square feet per factory square
 - B. 33 square feet per factory square
 - C. 50 square feet per factory square
 - D. 100 square feet per factory square
